

# Digital Assistive Technologies

for more participation and independence

# «We enable extraordinary people to do ordinary things.»

With sensitivity, expertise and innovative technologies, we enable people with handicaps to achieve enhanced participation and self-determination – throughout their lives.

## **We integrate – actively!**

Our activities empower people to live more independently with a physical or mental disability, or if they have a neurological disease. Our solutions help them to communicate in a more self-determined manner, to work more independently and to live in a barrier-free environment. This enables them to take a more active part in life and to achieve their goals more independently. It's time for a barrier-free world.

## **We are there for you and will gladly advise you!**

Make the most of the opportunity of obtaining advice from our experts.
